Assessment of exemplar

Compare the exemplar to your completed activity. Review your work using each of the criteria in the exemplar. *What did you do well? Where can you improve?* Use your answers to these questions to guide you as you continue to progress through the course.

Note: *The exemplar represents one possible way to complete the activity. Yours will likely differ in certain ways. What's important is that your activity demonstrates how you can map the skills you've learned through this program as well as other related experiences to different entry-level cloud data analyst roles and responsibilities.*

Your completed template should include:

- The titles and company names for three entry-level jobs that align with your skills, experience, and interests
- Three responsibilities or qualifications from each job posting that are relevant to your skills
- 1–2 sentences for each job that explain how your experience and skills align with that position
