✅ Cloud Data Analytics Resume Quiz

---

1. A cloud data analyst is updating their resume. They want to include a link to their portfolio. In what section of the resume should they include this link?

- ✅ **Projects**
  The Projects section is the best place to showcase your portfolio work and include links to dashboards, reports, or case studies.
- ❌ Experience
  This section is for past job roles and responsibilities.
- ❌ Portfolio
  Most resumes don't have a separate "Portfolio" section; it's typically integrated into Projects.
- ❌ Skills
  This section is for listing technical and professional competencies.

---

2. A learner that has just obtained the Google Cloud Data Analytics Certificate is updating their resume. They have worked in the service sector and have also completed an internship as a data analyst assistant. What should they include in the experience section of their resume?

- ✅ **Both the service sector jobs and the internship**
  Include all relevant work experience, especially if it demonstrates transferable skills like communication, problem-solving, or teamwork.
- ❌ Some job descriptions they find online
  Job descriptions are not personal experience and should not be included.
- ❌ Only the internship
  This omits valuable transferable experience from the service sector.
- ❌ Only the odd jobs
  This would leave out the most relevant analytics-related experience.

---

3. In which section of their resume should a learner include the Google Cloud Data Analytics Certificate that they earn?

- ❌ Skills
  Skills are for listing abilities, not credentials.
- ✅ **Education**
  Certificates and formal training should be listed under Education, along with degrees and other coursework.
- ❌ Experience
  This section is for job roles and responsibilities.

- ❌ Projects
  Projects showcase applied work, not certifications.
