🎓 Capstone Project: What to Expect – Module 2 Video Summary

📋 Clear Instructions & Examples
Before starting, you'll receive detailed instructions and have access to an example project.
➡️ This helps you understand the scope and expectations clearly.

🎯 Project Selection
You'll choose a project that aligns with your interests.
➡️ This makes the experience more engaging and relevant to your goals.

💼 Tools & Resources Provided
You'll have access to all necessary data, tools, and information.
➡️ Labs and interactive activities will support your progress.

🔄 Familiar Workflows
The tasks will resemble those you've already completed in the program.
➡️ You're well-prepared, and you can revisit earlier labs for guidance if needed.

🧠 Skill Application
You'll apply everything you've learned:

- Cloud storage & data management
- Cloud data processing
- Cloud data visualization
  ➡️ This is your chance to put theory into practice.

🗂️ Portfolio-Ready Output
Your completed capstone will be a personalized collection of work samples.
➡️ It's a strong addition to your portfolio and a powerful tool for impressing employers.

💪 Final Encouragement
Give it your best effort—this is your opportunity to shine and demonstrate your full capabilities as a cloud data analyst.
